SUMMARY

Motivated Computer Science student at the Arab Open University with a solid grounding in analytical thinking, software architecture, and core data workflows. Experienced in structured problem solving, relational and document database systems, and modern AI application paradigms. Proven continuous learner with hands-on technical training via Cisco Networking Academy and the CIB Summer Internship Program. Seeking opportunities to apply strong computer science foundations and analytical rigor to impactful software and data engineering roles.

PROFESSIONAL EXPERIENCE

Generative AI & Digital Banking Intern

Commercial International Bank (CIB) Egypt

08/2026 – 08/2026

Cairo, Egypt

- Participated in an intensive summer training program exploring Generative AI applications and digital transformation in the banking sector.
- Analyzed digital banking infrastructure, core operational workflows, systemic internal controls, and regulatory compliance.
- Gained hands-on exposure to practical AI methodologies, financial technology tools, and enterprise risk management frameworks.

Summer Training Program Participant

Training and Community Service Center (TCSC) - AOU

07/2026 – 08/2026

Cairo, Egypt

- Completed specialized technical coursework organized in collaboration with Cisco Networking Academy.
- Explored core Modern AI principles, prompt design, and machine intelligence paradigms.
- Engaged in hands-on technical labs and applied problem-solving scenarios focusing on real-world datasets.

EDUCATION

Bachelor of Science in Computer Science

Arab Open University (AOU) – Egypt

2023 – Present

Cairo, Egypt

- Pursuing a comprehensive curriculum focused on core computer science foundations, software engineering principles, and applied data analytics.
- Key Coursework: Data Structures, Analysis of Algorithms, Object-Oriented Programming (OOP), Relational Database Management Systems (RDBMS), Operating Systems, and Discrete Mathematics.
- Actively engaged in extracurricular tech workshops, coding challenges, and collaborative academic software projects.

SKILLS

Computer Science Fundamentals

Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Design, Problem Solving, Software Engineering Basics

Databases & Cloud Storage

SQL & Relational Databases, MongoDB, MongoDB Atlas, Mongoose ODM, Cloudinary

Programming Languages

Python, Java, C / C++, JavaScript (ES6+), PHP

Web & Development Tools

HTML5, CSS3, Responsive Design, Git & GitHub, VS Code

LANGUAGES

Arabic

Native Speaker

● ● ● ● ●

English

Upper-Intermediate (B2)

● ● ● ● ●

CERTIFICATES

Data Analytics Essentials — Cisco Networking Academy (Issued: Aug 2026 | • Covered core data transformation methods, foundational statistical analysis, SQL queries, and hands-on exploratory analysis workflows.)

Introduction to Modern AI — Cisco Networking Academy & AOU (Issued: Aug 2026 | • Verified understanding of machine intelligence paradigms, modern generative AI logic, prompt engineering, and open-ended practical applications.)

PROJECTS

Algorithmic Problem-Solving & Data Structures Suite10/2025 – 01/2026

Software Developer

- Implemented and benchmarked core Data Structures including Linked Lists, Binary Search Trees, Stacks, Queues, and Hash Maps in C++ and Java.
- Analyzed time and space complexities using Big-O notation, optimizing search, sorting, and recursive algorithms.
- Solved complex algorithmic challenges emphasizing modular code, edge-case testing, and OOP principles.

Student Community & Resource Hub01/2026 – 04/2026

Full-Stack Developer

- Engineered a modular academic web application utilizing JavaScript (ES6+), applying Object-Oriented Programming (OOP) and clean architecture principles.
- Integrated MongoDB Atlas as a scalable cloud database solution, configuring schemas and queries via Mongoose ODM.
- Implemented remote media asset management and image upload pipelines utilizing Cloudinary.
- Managed version control, branching workflows, and collaborative codebase synchronization using Git & GitHub.

Data Exploration & Statistical Insights Pipeline05/2026 – 07/2026

Data Analyst & Developer

- Designed and implemented an exploratory data pipeline using Python and SQL to clean, filter, and extract core metrics from structured datasets.
- Conducted descriptive statistical analysis to identify behavioral trends, data anomalies, and key performance indicators.
- Evaluated modern AI integration patterns to summarize findings and streamline exploratory data reporting workflows.
